Project Work Schedule

1. Tabular schedule of the planned R&D work in the project

#	R&D work stage name	Project start date	Project implementation period (not longer than until Dec. 31, 2029)					
			Year 1	Year 2	Year 3	Year 4	+1	+1
1.	…………………………………………… ……………………………………	dd.mm.yyyy						
2	…………………………………………… ……………………………………							
3	…………………………………………… ……………………………………							
4	…………………………………………… ……………………………………							
…	……………………………………							

Schedule in the table the planned R&D work divided into clearly defined logical stages. There is no limit on the number of stages. Assign an adequate period of work performance to each stage.

2. Description of the R&D work with of parameterized milestones for each stage of the project

Stage name*	Max. 200 characters
Description of the R&D work planned for the stage	Max. 3,000 characters *Describe the R&D work required for verification (confirmation or rejection) of the research hypothesis set out in the Project. The planned work must be adequate (i.e. necessary, justified and sufficient to achieve the objective of the project / solution of the problem).*
Milestone name	Max. 200 characters
Description of the method of verification of the milestone's parameters	Max. 500 characters
Description of the impact of not reaching the milestone on the implementation of the project	Max. 500 characters

* If there are more stages, copy and paste the table.
