

INTERNATIONAL RESEARCH AGENDA

(max. 10 A4 pages, excluding title page and max. 1 page of references)

- Measure International Research Agendas involves the creation of a research institution based on a single, coherent research agenda that aims to solve a significant challenge in a novel way;
- The research approach must be original and unique in the world, not just the country;
- Research planned in the research agenda includes industrial research or experimental development. Fundamental research is excluded from support.

Name of the Head researcher of the project: [Click or press here to enter text.](#)

Project Title: [Click or press here to enter text.](#)

The International Research Agenda should include a description of the work of all research groups (not less than 2) planned by the Applicant. The Regulations for Project Selection do not specify a maximum number of research groups. The document should include:

- A description of the proposed research problem and its relevance to scientific progress worldwide; whether the proposed research has the potential to make a breakthrough or open up new avenues in science. The evaluation is subject to a submitted IRAP that encompasses a holistic approach to solving a well-defined issue of high scientific relevance and allows increasing the transfer of research results to the economy;
- Originality and competitiveness of the approach in the planned research to the scientific problem set in the agenda, taking into account the state of research in the field carried out in the best scientific centres in the world;
- Justification of why a dedicated IRAP unit is necessary for the successful implementation of the research programme;
- Feasibility of the research agenda in terms of available resources for the project and time to achieve initial results;
- Synergy between the research groups and other R&D staff and a common research objective to be achieved through collaboration between all research groups.
- Clearly defined objectives (overarching and intermediate), project milestones **excluding fundamental research**, and the key risks that may arise during project implementation and Measures to mitigate identified risks.
